

BIOMETRIX CPT

Custom Procedure Tray for Heart Surgery

Biometrix offers a completely tailored heart surgery custom procedure tray designed and ready-to-use for your specific procedure. The tray enables you complete control over packaging and components, fitting your specifications and ensuring the highest level of performance and efficiency.

Committed to quality solutions, the tray includes the complete product portfolio of sterile single-use components for the various heart surgery procedures.

Biometrix CPT Heart Surgery provides a reliable and efficient procedure tray, ensuring high performance and significantly reducing overall surgical procedural expenses.

- Manage emergency cases quickly and confidently
- Reduce cost and setup time of overall procedures
- Simplify and quicken stocking and restocking
- Maximize infection control with sterile single-use products
- Save space and minimize waste with compact packaging

You are just a few steps away from your individual user-friendly Biometrix CPT Heart Surgery:

1. Choose the components you require from the product list.
2. Review the (non-sterile) sample tray, provided for your convenience.
3. Discuss proposal and receive contract offer.

Biometrix offers an extensive choice of first class components, allowing you to create the optimized tray and save your organization time, money and hassle.
